

★ MEDICLINK SERVICE FEATURES

AMBULANCE AND RESPONSE SERVICES

Medic-link or emergency alarm messages can be sent directly to the Ambulance Service, family members, health professionals and/or other call-out representatives via internet, text, email or phonecall should a health situation require immediate attention.

MOBILE TECHNOLOGY

Medic-link products are based on various mobile phone technologies and include the ability to roam free within most towns and cities whilst remaining connected to the **ALARMNZ** monitoring system and helpdesk team.

GPS TRACKING & MAPPING SYSTEMS

Each device supplied to a *Medic-link* customer includes assisted Global Positioning System technology that in emergencies gives the **ALARMNZ** helpdesk operator and/or family & friends the ability to locate that *Medic-link* phone user in trouble via an electronic map.

SOLUTIONS FOR ALL AGES

Medic-link mobile devices are available in all styles and packages such as small pendant wrist phones and larger phones. Accessories include Bluetooth devices that can transmit clinical standard heart rate, blood oxygen levels, blood pressure and respiratory data to health professionals instantly.

ALARMNZ is a fully accredited Grade 2B Alarm monitoring centre approved and registered with all relevant government agencies for the delivery of emergency alarm response services. The *medic-link* technology offered by the company meets all statutory requirements for such devices and conforms to standards required by all health authorities.

ALARMNZ has a reputation for careful data management and service excellence and is recognized by the majority of independent alarm service agents as a premium Tele-Health Alarm monitoring service provider.
