## INFRASTRUCTURE SOLUTIONS

### Direct Brigade Fire Monitoring

Our Automatic Fire Alarm monitoring service connects any compliant standard conventional and advanced addressable Fire alarm panels, Sprinkler/Suppression and evacuation systems directly to Fire Emergency New Zealand "FENZ" automatic despatch system. There are 3 service levels offered depending on your needs.

### Elevator Emergency Telephone Lines

We provision and install emergency telephone lines for elevators and entry/exit intercoms. Each of these connections are 24/7 battery backed up and monitored for continuous user availability and offline detection for health and safety. There are 3 service levels offered depending on your needs.

### Security Monitoring and Perimeter Alarms

Our Alarm monitoring solution interfaces with all leading major brands of security detection equipment and cloud-based platforms including Apple, Google and Samsung etc. We support remote web viewing and arm/disarm control via smartphone apps including remote offsite programming by any support engineer. There are 3 service levels offered depending on your needs.

### Integrated Building Monitoring System

Our Building Infrastructure monitoring solution interconnects manual/automation systems including Heating and Ventilation (HVAC), lighting, pumps, tanks, sewage systems, generators, Utility meters, elevators, boilers, furnaces, refrigeration, Fire/Security, vehicle and visitor access systems. We support remote web viewing, smartphone apps for remote offsite programming by any support engineer. There are 3 service levels offered depending on your needs.

### Nurse Call and Medical Monitoring

Our Healthcare monitoring solution supports all leading brands of nurse call and medical alarm equipment used in private homes, retirement villages and base hospitals. We also support remote web viewing and activity detection via smartphone apps by any family member or any nominated outside agency. There are 3 service levels offered depending on your needs.

### Lone Worker Health and Safety

Our workplace personal safety monitoring solution includes a smartphone APP designed to send urgent GPS alerts to our 24/7 helpdesk call centre for processing to emergency response services. This service supports company/corporate policy objectives and facilitates compliance to government OSH regulations. There are 3 service levels offered depending on your needs.
